

MORRISON NATURE CENTER AT STAR K RANCH AURORA, COLORADO

Coordination is Key

Upon joining the project team, Crestone Consultants quickly played an integral role in developing maintenance facility and public gathering pavilion improvement location alternatives. Crestone also provided coordination with a larger multi-million dollar floodplain improvements project which was occurring simultaneously to ensure the two separate projects would come together seamlessly without negatively impacting each other. The dedication of the two project teams working together helped to make both projects individually and collectively a success for the residents of the Aurora community.

Morrison Nature Center
at Star K Ranch

The Project

This design/build project included the addition of maintenance garage facilities and public gathering pavilions on the 200 acre Morrison Nature Center at Star K Ranch open space park in Aurora, Colorado. The goal of this project was to enhance gathering opportunities for the Nature Center guests while providing formalized maintenance storage facilities for the Nature Center staff.

Crestone Performed Services

Working with the City of Aurora, our services included the following items to allow for project permitting:

- Construction Documents & Specifications
- Coordination
- Drainage Design
- Floodplain Analysis
- Grading and Erosion Control Design
- Jurisdictional Processing
- Site Improvements Layout
