PROFESSIONAL SUMMARY

Joe's professional experience in the field of civil engineering since 1996 has ranged from analysis, planning, design, coordination, observation, and management of land development, energy development, and infrastructure assessment projects in both the private and public sectors.

As a professional engineer, Joe has managed civil infrastructure assessment and design projects ranging from 0.5 acre to 1,200 acres in size and includes utilities, grading, drainage, erosion mitigation, stormwater management, roadway, and site development systems. Joe takes pride in collaborating with project development teams to create innovative assessment and design solutions which are integrated to create sustainable solutions while maximizing development potential.
