

STORMWATER MANAGEMENT SERVICES

Compliance Matters

Understanding the importance of ensuring compliance with the continually changing stormwater and erosion control management regulations, Crestone Consultants is fully committed to providing complete, organized, and cost effective compliance solutions. We recognize that stormwater management has become one of the most difficult costs to correctly identify and maintain through the life of a project. Knowing this, our team brings value by identifying and implementing cost effective stormwater management solutions. To ensure our value, we are dedicated to:

▪ **Training-**

With over 20 years experience and training in stormwater and erosion control design, inspection, and consulting services, it is our priority to continually train our staff through private and public entities to ensure we are always up to speed on the latest local, state, and federal compliance regulations.

▪ **Technology-**

We recognize this aspect of development is still very young and ever changing. Subscribing to several forums, we are always collaborating within our industry to learn the newest technologies and practices that will minimize costs for our clients.

▪ **Communication-**

A key to our success has been our commitment to taking a pro-active approach in communicating with the regulators. We understand potential profits are on the line and it is our goal to keep things simple and get it right the first time. We have established relationships, built on trust, with many regulators throughout Colorado and this helps us to negotiate solutions which benefit our clients.

Crestone Stormwater Management Services

Our stormwater management services have been provided to contractors and developers on many projects and in many jurisdictions. Some of the local jurisdictions serviced include: Arvada, Aurora, Boulder, Brighton, Denver, Douglas County, Englewood, Lakewood, Thornton, Town of Castle Rock, and Westminster.

Whether it be developing a Stormwater Management Plan (SWMP), or providing consulting through construction of a project, Crestone Consultants offers a full array of stormwater management services. Such services include:

- BMP Planning
- Implementation & Cost Consulting
- MS4 Guidance Services
- Preparing SWMP, SWPP, GESC Reports
- Site Inspections
- Site Management
